Art Unit 1713

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-27 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Takiguchi et al., U.S. Patent 4,748,199 or Diehl et al., U.S. Patent 5,399,627 or PCT WO 91-05014 each taken alone and in the alternative.

Each of these patents shows gel compositions which are based on the block copolymers having ester compounds incorporated therein. See specifically columns 6 and 7 of the Diehl et al. patent, the Abstract as well as columns 4 and 5 of the Takiguchi et al. patent and the PCT document throughout the Examples. While it is noted that some of applicants' claims contain the

language "substantially free of mineral oils", there remains no quantitative measure of exactly what "substantially free" means and as such, the relative terminology is seen to be anticipated by the prior art. Furthermore, the prior art does show compositions which have no mineral oil in them and it is prima facie obvious to leave out an ingredients and lose its known function.
